Dear Members,

RE: REDISA – Recycling and Economic Development Initiative of South Africa

The Recycling and Economic Development Initiative of South Africa (REDISA) and SAIBPP have signed a Memorandum of Understanding effective immediately. This allows REDISA to source properties required for its Waste Tyre Management Plan, exclusively from SAIBPP members.

REDISA supports and promotes tyre recycling, providing the collection and depot infrastructure required to collect waste tyres from across the entire country and deliver them to approved recyclers. The depots are leased or owned by REDISA and given to PDI SMMEs to manage.

As SAIBPP we are expected to be a communication gateway between REDISA and our members with suitable properties, REDISA retains the right to choose the properties it deems suitable for its needs.

We will communicate with our members through our website and direct email notices to make them aware of the opportunities available. Should a member wish to respond to a request for property they will communicate with the SAIBPP office and their response will be forwarded to REDISA for consideration.

Kind regards,

Mr T Matlala
President (SAIBPP)
